

Victoria's Unique Amusement Centre Officially Opened

With appropriate pomp and ceremony the Hon. W. G. Nichol, Lieut.-Governor of British Columbia, and D. C. Coleman, Vice-President of the Canadian Pacific Railway, opened the Crystal Gardens, Victoria—the largest and finest salt water swimming pool and amusement centre in Canada—recently.

The building takes the form of a winter garden, sunlit by day and glittering by night with an atmosphere heavy with the scent of flowers and throbbing with music from a string orchestra. Built on a two-acre property, facing the fragrant gardens of the Empress Hotel, Crystal Gardens is of generous proportions, with lower portions in brick and concrete, and superstructure of steel and specially designed glass. The interior is a huge conservatory with vines and palms and plants growing in abundance, and in the centre the largest salt water swimming pool in the continent.

Upper—The Swimming pool.

To give a human scale effect, from the second story promenade and dancing floors above, there are concrete steps down to the landing of the pool, which is 150 feet long, 40 feet wide and 9 feet deep at its deepest point. Salt water is pumped

Lower—A section of the Promenade.

from Beacon Hill Beach, a distance of nearly a mile, and maintained at a temperature of 70 degrees, and kept in constant circulation. The water is, of course, sterilized, and before entering the pool passes under showers of varying temperatures. Among other attractions there are a gymnasium, hot salt water baths, art gallery, two dancing floors and a tea-room.

Conservatives Sweep New Brunswick

The Conservative Party of New Brunswick, led by Hon. J. B. M. Baxter, won a sweeping victory in the provincial election held last Monday, when the government secured but 12 of the 45 seats.

The final result was:

	Before	After
Conservatives	12	36
Liberals	29	12
Farmers	7	
Total	48	48

Successful Pupils Midsummer Exams

The following pupils have passed their mid-summer examinations held at Oyen School.

Grade VIII—100 per cent. 8 pupils out and all passed. Gertrude Charbonneau, Clara Gilbertson, Norman Charter, Cleo Binex, Josephine Love, Gladys Lake, Deighton Pfeiffer and Eunice White.

Grade IX—Laura Charbonneau, Clotilde Dearden, Wilbur Johnson and Charles Gilders. Conditioned in one subject: Roy Sharp, Bella Lees, Alexander Wright and Howard Wade. Conditioned in two subjects, Edith Bolman.

Grade X—Ella Johnson, Maxine Sutherland and Jocelyn Henry. Conditioned in one subject: Dorothy Love, Russell Johnston, Karin Westerland, Irl England and Catherine Wright.

Grade XI—Caroline Johnson, Gertrude Cleugh. Conditioned in arithmetic, Anna Mitchell.

Fruit

First shipment of Plums and Peaches is due about August 18. Transcendent Crab-apples are always in great demand and the season for these does not last long. Get your orders in early.

A little sulphur spread through your oat sheaf stack will keep the mice away. We have sulphur in stock at 8c a pound in quantities.

Harvest is upon us. You will need the very best of groceries. Our large turn-over enables us to buy to best advantage and to keep our stock always fresh.

Let us figure on your next grocery bill.

Order your Ontario Blueberries Now.

S. A. Miller

Granaries, New Buildings or Additions

The policy of many thousand lumber yards in the Prairie Provinces, is to line-up as far as possible, their fall business, and order from the mills accordingly. This is necessary to avoid carrying unduly large stocks. As it takes from two to three months to get these orders filled, it will be readily seen that the yards which order "light", may not be in a position to fill orders for customers who do not plan ahead.

Plan your building program now and get material while our stocks are complete.

The Oyen News

Here and There

During July thousands of osteopaths and members of allied professions gathered in Toronto from all parts of the United States and Canada to attend the International Convention of Osteopaths. Several of the visitors toured the country in the interests of osteopathy.

Final figures showing the total live lobster catch on the Nova Scotia coasts, for the season ending June 1st, show a total of 5,585,900 lbs. valued at \$1,264,141, an increase over the 1924 season of 2,857,400 lbs. in quantity and approximately half a million dollars in value.

During his tour of Western Canada over the Canadian Pacific lines, Field Marshal Earl Haig was received on all sides by cheering and enthusiastic crowds. At towns in northern Ontario and elsewhere he shook hands and exchanged reminiscences with local ex-servicemen, many of whom he recognized.

Having concluded his visit to the Pacific Coast, His Excellency Lord Byng, Governor-General of Canada, has returned East. Before leaving the West his Excellency stayed off for a few days at Banff to meet Earl Haig, and the two famous soldiers spent some time together talking over old times.

Considerable interest has been aroused in London, England, over the arrival there of 8,000 peony blooms for exhibition in the Canadian Pacific pavilion at Wembley. The peonies were grown by W. Creighton Roy of Montreal, and have been sent to England to dispel the belief that Canada's climate is excessively cold.

A delegation of prominent newspaper proprietors and journalists from Great Britain passed through Canada recently on their way to attend the Third Imperial Press Conference to be held at Melbourne, Australia, during September. Besides the delegates from the British Isles, representatives of Canada and the other Dominions have been invited and will attend the conference.

OBITUARY

Janet Gillis Cunningham

The death of Janet Gillis Cunningham, beloved wife of Robert Cunningham, occurred at her home north of Oyen, at an early hour on Thursday, August 6. The funeral was conducted on Friday by Rev. H. H. Haeckel, services being held at the Cunningham home in the afternoon, interment following at Oyen cemetery, when immediate relatives and a large gathering of friends were present.

She deceased, who died in her in her sixty-seventh year, is survived by her husband, Robert Cunningham, three daughters, Mrs. Wicks and Mrs. Paulson, both of this district, and Mrs. Exley of Hamilton, Ont., and five sons, Duncan, James and William of this district and Robert and Tom of Bowden.

The late Mrs. Cunningham, who came to this district from Ontario in 1911, was held in high esteem by all who knew her. Beside her family, she leaves a wide circle of friends to mourn her loss.

In an effort to individualize the name of Saint John, N.B., the City Corporation, Board of Trade, and other organizations are in future to spell its name out in full. This part has grown rapidly in importance in recent years and in addition to being the winter headquarters of the fleet of the Canadian Pacific Railway, is also a part of call for numerous lines operating between Canada and Europe, as well as the centre of a large fishing industry.

MINERS AGREE TO RESUME WORK IN NOVA SCOTIA

Halifax.—The British Empire Steel Corporation advised Premier Rhodes that they had accepted the Nova Scotia Government's proposals for a settlement of the provincial coal strike.

In a telegram from Montreal to the provincial premier, Roy Wolvin, president of the corporation, announces his company's decision to accept the settlement proposals "in order to avoid further disaster to the province and on your representations that it is for the general benefit of the people of Nova Scotia."

The miners of Nova Scotia employed by the British Empire Steel Corporation agreed, by a majority of 1,135, in a plebiscite today, to return to work under the proposals of the Provincial Government. There were 6,093 votes polled, many of the miners abstaining from balloting.

Mr. Wolvin's telegram says: "The Dominion Coal Company, Nova Scotia Steel and Coal Company, Cumberland Railway and Coal Company, and Acadia Coal Company, after protracted deliberations, hereby accept the conditions of the memorandum which you delivered to me in Halifax, July 31.

"This acceptance of your memorandum is at the request of the government, and solely to avoid further disaster to the province and on your representation that it is for the general benefit of the people of Nova Scotia."

Press Delegates Have Reached Honolulu

Canadians Will Leave On Return Trip October 8

Honolulu.—Delegates from Great Britain, Canada and other British Dominions on their way to the third imperial press conference in Australia, arrived here on the liner *Austral* and were warmly welcomed by the representatives of the Government of Hawaii and the people of Honolulu.

Today, the British press party is being entertained by the chamber of commerce to a sightseeing tour, culminating in an official luncheon. During the voyage from Vancouver, the Canadian delegates organized their section with J. H. Woods, of Calgary, president of the Canadian Press Union.

The conference will open in Melbourne, September 29. The Canadians in the party probably will leave Australia for the return trip on the liner *Marika* on October 8.

Important Gold Finds

Paying Quantities Being Taken From Canadian District, B.C.

Wraggell, Alaska.—After repeated reports of failures, gold is being taken in paying quantities in the Telegraph Creek district of the Canadian territory, British Columbia, where a strike was made last autumn.

First shipments of gold from the district, which lies 300 miles east of here, were in Wraggell today, brought by a boat on the Sitka River.

One claim on Gold Bar Creek are paying from \$25 to \$20 a day per man. News that gold was really coming out of this country, following apparent authoritative reports that a stampede into the Caspar in the spring had been a fiasco, has set persons who had abandoned claims to restoring them.

The gold brought here was obtained when miners began washing or cleaning up miners they dug out and gilded up.

Chicago's Crime Increases

Chicago.—Persons being murdered in Chicago at a rate of more than one each day. A total of 227 have been murdered in this city. If this rate of the last 211 days continues for the next 154 days, the Chicago murders at the end of 1925 will number 391.

Support Legion Idea

North Bay, Ont.—A mass meeting at a service men, attended the "Soldiers' Day" of the North Bay Old Home Week activities, unanimously gave assurance of their wholehearted support in making the proposed British Legion of Canada an accomplished fact.

Will Keep Government House

Edmonton.—By a vote of 22 to 10, the Alberta Legislature, on motion of Dr. J. B. Stewart, Conservative, Lethbridge, seconded by Premier Greenfield, re-elected the Davidson-McKenzie motion of March last, calling upon the government to not sell the reserve property of Government House.

May Be President Of League Assembly

Name of Senator Dandurand, Canadian Delegate, Is Mentioned

Grenoble.—Senator Ruel Dandurand, chief Canadian delegate, is being prominently mentioned for the presidency of the assembly of the League of Nations, which will begin its sessions here, September 7.

Denmark has requested the secretary of the League to send a telegram to the president of the League for the purpose of the creation of a commission of conciliation at the permanent court of international justice at The Hague.

The first reaction in League of Nations circles to the Danish proposal is that it represents an attempt by neutral states to remove from the council of the League of Nations the exercise of conciliation, which hitherto has formed a notable feature of the council's activities, and place it under the jurisdiction of the world court, which would appoint conciliators in any dispute.

RAILWAYS OFFER NORTH COUNTRY PRAIRIE RATES

Edmonton.—Both the Canadian Pacific Railway and the Canadian National Railways have agreed to amend their rates in regard to operation of the Peace River lines, by undertaking to give the benefit of a prairie rate basis for a temporary period, pending the conclusion of satisfactory terms with the Royal Bank.

Premier Greenfield made a statement to this effect in the legislature. He said he had received advice from both railways since his statement in the house on Aug. 4, but that this constituted the only new development in the situation, nothing further having been heard from the bank.

The effect of the new undertaking by either railway will be that for at least one season, and perhaps for more, a temporary arrangement will be in force by which the north country will be given a one-line haul rate, thus meeting one of the strongest objections that have been made against the proposed new line of service. Presumably, no new lease will be necessary if the government negotiates the only new development with the C.P.R. continue, thus amended, until the complications with the St. Helena are worked out.

St. Helena Welcomes Prince

Visit Paid to Place Where Napoleon Was Interred

St. Helena.—A guard of honor of British ex-servicemen, Boy Scouts and Girl Guides, and enthusiastic crowds welcomed the Prince of Wales here when he landed from the *Repulse* for a short stay on his way from Cape Town to South Africa.

The Prince went to Government House, where he received prominent members of the community. Later he visited Longwood, where Napoleon was interned, and was shown around the estate.

In the afternoon Wales played golf, and in the evening was the guest of honor at an official dinner, afterward attending a reception and dance.

Honor Memory Of Canadian Author

Admirers of Louis Hemion Place Tablet in House at Brest, France

Paris.—The memory of Louis Hemion, famous Canadian author, has been honored, thanks to his Canadian admirers, when a bronze tablet was placed in his natal house at Brest. The town of Quimper already has named one of its principal streets after the author, who has been said to be more celebrated throughout the world than in his own country.

The tablet bears this inscription: "In this house was born Louis Hemion, author of *Marla Chapdelaine*. This tablet was placed by his admirers in Canada."

Cannot Unveil Memorial

Edmonton, Alta.—In a wireless dispatch from the steamship *Distributer* to the Edmonton Journal, Major Hodgson, private secretary, announced that Lord Byng regrets he will be unable to unveil the memorial at Strathmore, Alta., this summer, as his list of engagements in the west for this year is quite full.

Woman Executed in Ireland

Dublin.—A rare event in Ireland—the execution of a woman—took place in Mountjoy Prison today. The woman, Mrs. Michael Talbot, was put to death for the murder of the husband of Mrs. Walsh at Limerick. Talbot was a relative of the victim.

ALLIED DEBTS DISCUSSED BY BRITISH HOUSE

London.—The question of the allied debts to Great Britain was discussed briefly in the House of Commons when Walter Edward Guinness, financial secretary of the treasury, in replying to a question, said he presumed the debt negotiations with France which had been interrupted by the return of the French experts to Paris, would be resumed in due course.

When a member asked if the negotiations had ended, as reported, in "an acrimonious breaking off," Mr. Guinness replied emphatically: "Nothing of the kind."

Mr. Guinness continued that a preliminary exchange of views had taken place with the Italian Government regarding Italy's debt to Great Britain. He said he understood Italy was framing proposals on this subject. He concluded that while not all the governments to which the recent British note was addressed had replied, he had no reason to suppose any of them would raise any difficulty with regard to the principles enunciated in that note as a fundamental basis for debt settlement.

Will Assist In Fruit Probe

R. F. McWilliams, K.C., of Winnipeg, To Act With Government Attorney

Winnipeg.—An announcement was made that R. F. McWilliams, K.C., of Winnipeg, had been appointed as chief assistant to J. C. McNeil, K.C., of Toronto, in conducting the investigation into the affairs of the Nash Fruit Interests throughout Western Canada. An action was taken against the company under the Dominion Combines and Investigation Act, and the books of the various company branches seized by R. C. McNeil, K.C., of Toronto, in conducting the investigation into the affairs of the Nash Fruit Interests throughout Western Canada.

Minister Wins Bard's Crown

Freilich, Wales.—The bard's crown of the Welsh chieftain, national festival for the encouragement of music and literature, has been won for the third time by R. C. McNeil, K.C., of Winnipeg, who was winner in 1913 and again in 1917. Ten thousand persons attended the festival delegations coming from the British colonies and Dominions and from the United States. There were more than 3,000 entrants in the competitions in music, drama and poetry.

Form Fire Association

Calgary, Alta.—The inter-provincial association of fire fighters was officially born in Calgary when the conference of delegates from Saskatchewan and Alberta cities formally adopted a constitution.

EARL HAIG AS ENGINE DRIVER

When Field Marshal Earl Haig crossed the Canadian Rockies on his special Canadian National Railway train, he expressed a wish to drive the engine of his special, while below him was shown with Countess Haig, looking out toward Mount Robson, the highest peak in the Canadian Rockies.

Compromise Motion On Natural Resources

Alberta Urges Government to Close Negotiations For Transfer

Edmonton.—At a recent session of the legislature, a compromise motion on the natural resources question was unanimously agreed upon, and will be sent to the Federal Parliament at Ottawa. The motion is as follows:

"That the legislature should strongly urge the Government of Canada to use every effort to facilitate the closing of negotiations for the transfer of the natural resources to the province of Alberta, based on the general principles embodied in the draft agreement submitted, and as to the details thereof, upon terms and conditions that can be accepted as fair and equitable."

British Women Gain Victory

Admitted to Royal College of Surgeons On Equality With Men

London.—British women have gained another victory in their fight for equal rights with men when the Royal College of Surgeons decided to admit women on the same terms and under the same conditions as men. Therefore, women have been admitted to the college as fellows and members, but without the right to vote as members of the college for the council, which is the executive body of the college.

In the future, women also will be eligible for seats on the council, which right heretofore has been denied them. There are at present 13 women fellows and members who are affected by the decision.

New Air Record Set

Message From Illinois Answered in Fifteen Minutes From Arctic

Arlington Heights, Ill.—For the first time in history, the successful direct transmission and reception of messages to and from the Arctic Polar area was recorded when the MacMillan Arctic expedition answered a query of newspapers from a local radio station.

The expedition, located at Etah, Greenland, approximately 2,700 miles north of Chicago, clearly heard the message, and within 15 minutes the answer came back, scarcely thirty seconds by static and adverse weather conditions.

Failed in Channel Swim

Dover.—Miss Sloan, the French girl, failed in her effort to swim the English Channel. She was within a mile and a quarter of Dover when she gave up.

For Prairie Harvest

Victoria, B.C.—More than 200 men will leave Victoria for the fall harvest on the prairies in the next few weeks, according to the department of labor here.

Difference Over Security Pact Matter Not Ready For Discussion

Between Foreign Ministers

London.—Arthur Balfour has created an awkward situation for the British Government by his announcement that he is coming to London to talk with Austen Chamberlain on the security pact without having first consulted Mr. Chamberlain about the matter.

A serious difference of opinion has arisen between the French and the British over the drafting of a note applying to the latest German communication in security, and there is still much to be thrashed out before the matter is ready for discussion between the foreign ministers. The situation is not helped by the disagreement on a debt settlement. The French offer is so small as to be contemptible, and the comments of the French press on the British refusal to accept it, show there is no real desire of the French to meet their obligations.

Test Flights Successful

MacMillan Expedition Intends to Establish Base on Ellesmere Island

Washington.—With all three of its airplanes assembled, last night was conducted at Etah, Greenland, by the MacMillan Arctic expedition, one being to a height of 5,000 feet and over others. Lieut. Commander Byrd, commanding the navy section of the expedition, said in his radio message to the department, that, despite the encountering of bitterly cold temperatures, the motors behaved perfectly.

It is understood to be the intentions of the expedition to next establish a base on Ellesmere Island, across from Etah, which is about half way to Cape Thomas Hubbard, on Axel Heiberg Island, where the advance flying base will be located, overlooking the polar sea.

GOLD STANDARD WORKING WELL SAYS CHURCHILL

London.—Britain's return to the gold standard, which during recent weeks has been regarded by many as a constant, source of adverse criticism from various sources, was staunchly defended in the house by Winston Spencer Churchill, chancellor of the exchequer.

Unquestionably, Mr. Churchill declared, the gold standard affected everything to a certain degree, and anyone who argued the fact that everything disagreeable which had happened since the gold standard was restored was due to its restoration. "Disagreeable" things, he said, were happening, he remarked. He then asked that the government's action be judged not by fluctuations occurring over short periods but by its value in the long run.

"I do not think the action the day," the chancellor continued, "the British empire would have taken it without us and come on to a gold standard, not of the pound sterling, but of the dollar."

The chancellor said he was cognizant of the growing tide of criticism and propaganda against the gold standard, but he pointed out that the critics disagreed among themselves and that no political party had challenged the government in action. The government was "valiantly unrepentant."

Many War Claims Filed

Saskatchewan Residents Ask Indemnity From Germany For Losses

Regina.—Twenty-two war claims amounting to over \$100,000 have been filed by Saskatchewan residents against Germany as a result of her activities during the war. The majority of the claims are for loss of personal effects and in some cases for loss of relative about whose whereabouts were tormented by the Germans, according to James Field, K.C., Ottawa, was chairman of the commission.

Angela Sheldon Williams, of this city, had the most interesting claim to present to the commission. Her claim is for \$400 for drawings and paintings lost at sea through enemy action.

Mrs. Gertrude Allen K. Dowling, now at Winnipeg, has a claim for \$20,000 for the loss of her husband on the H-liner *Lastania*. Mrs. Martha Ellen Matthews, of 19 Upper Block, Moose Jaw, also claims \$40,000 for the loss of her husband on the *Lastania*.

Rahms Michael, of Montclair, born in 1874, but naturalized in Canada in 1905, has a claim for \$56,377 for the loss of his son, personal effects, and injuries to his wife and family in addition to personal property lost.

MAKE MARITIMES ONE PROVINCE IS SUGGESTION

Mouquet.—The French language newspaper *Le Quatre-Vents* has suggested: "More and more interest is being taken in the suggestion that one province should be made of the three Maritime Provinces, an answer admirable to the needs of this part of the Dominion as much from the federal as from the provincial point of view."

"The Maritime Provinces together represent only a population of one million souls; their territory is very small in comparison with the other Canadian provinces, yet there are three provincial governments to direct their affairs. This represents an annual large sum of money swallowed up by the civil service of each province and by the parliamentary machine of each one."

United Church Will Deal With Pastors Too

May Make Changes and Transfers

Toronto.—Changes in pastors of the United Church of Canada may be proceeded with soon. It was expected that changes would be delayed until the next meeting of the general council. This alteration has been effected by the executive of the council, which recently constituted an important meeting. Transfer committees of the various conferences for the year ending September or October when they meet. Settlement committees are also expected to proceed at once with the settlement of the pastors.

The executive decided that the commission to take up the permanent report of the great national and financial sections having publications, education, funds and church department, shall assemble in Toronto in December. Offices for the moderator and secretary of the council will be opened at once. There was much discussion of the great national and financial drive to be undertaken from October 4 to 18.

Harvesters From East Will Be Available

Estimated West Will Need Approximately Sixty-nine Thousand

Ottawa.—Enquiry at the department of immigration and colonization elicited the information that approximately 69,000 harvest hands would be required for the coming season in the West. Of this number it is estimated that the western provinces will supply about 19,000, and that a complement ranging from 20,000 to 30,000 may be secured from Eastern Canada, owing to the early harvesting in the east. No definite indication, however, had been given as yet by the railways in regard to the number available from the east.

Cancelled Sailings To China

Missionaries Will Go In October If It Is Considered Safe

Toronto.—Accepting the judgment of the West China mission, the Methodist mission board of the United Church of Canada cancelled the sailings arranged for 28 persons scheduled to leave Vancouver for Shanghai and Chungking, September 5.

Officials were instructed to arrange bookings for the middle of October, as that was the earliest date considered safe by leaders now in the field.

Eight missionaries, five missionaries' wives and 15 children were included in the party affected.

U. S. Aviators Join French

Have Enlisted "On Side Of Sultan Of Morocco"

Paris.—As plans are being developed by the French command in Morocco for a strategic offensive movement in the near future with a view to bringing the rebellious Rifians to terms, the United States aviators are on their way to Morocco for service with the French aerial force.

The previous aviators who volunteered for service "on the side of the Sultan of Morocco" left France for the battle zone, six of them going by aeroplane and five by train.

To Reduce Strife

Quebec.—Immigration officials here are expecting a general outbreak of racial strife, but are not alarmed, but declare that the clash will not be made until after the federal elections, in which it is assumed that the pro-French personnel is anticipated.

W. N. U. 1589

A gorge of the Yangtze River, China, deeper than the Grand Canyon of the Colorado, has been explored and several valuable discoveries made. A tree which yields oil valuable in the treatment of leprosy is a notable find. Another is a blight-resisting chestnut tree, with which an effort will be made to restore the diseased chestnut timber crop of the United States.

Production And Export Of Pure Seed Is Becoming An Important Industry In Canada

Canada is making very marked progress in the production and export of pure seed, and the annual meeting of the Canadian Seed Growers' Association, which opened the past year to have been an outstanding one in this regard. Between the two meetings, according to the records presented, the association's crop registration service had increased almost one hundred per cent. In 1923 there were registered about one hundred fields and in 1924 about two hundred fields. In 1923 the acreage of seed crops registered in 1924 were as follows: Wheat, 17,000 acres, 255,000 bushels; oats, 11,000 acres, 482,000 bushels; barley, 500 acres, 15,000 bushels; alfalfa, 400 acres, 2,000 bushels; alfalfa, 400 acres, 400,000 bushels.

The year 1924 was a very active one for the association with a great deal of work being done in the organization and putting into operation of two new co-operative units of membership for the association, cleaning, storing and selling of registered seed stocks, one of these being located at Moose Jaw, Saskatchewan, and the other at St. John's, New Brunswick. The demand for the seed products of these plants was in excess of available supplies.

To meet the requirements of farmers desiring cleaning machinery which would be efficient for preparing seed for the grades "Registered" and "Extra No. 1," the association found it necessary to go abroad and import machinery from France. Several of the most modern machines accordingly have been delivered to private growers and Dominion and provincial stations at Toronto, Alberta; Miami, Manitoba; Winnipeg, Manitoba; New Liskeard, Ontario; Kamloops, Ontario; Guelph, Ontario; and Fredericton, New Brunswick.

During 1923 nearly 70,000 bushels of pure seed grain were handled and marketed by the Alberta Provincial Seed Plant. In Southern Alberta, from the new plant established for alfalfa seed, some 250,000 pounds of alfalfa seed were marketed. A feature of the year was according to the association records was the marked interest evinced in the registration of fodder and forage seed crops. Fodder seed crops, such as timothy, clover, and alfalfa, are now being distributed for multiplication, principally in the prairie provinces and British Columbia, and it is quite apparent that in the future a few years fodder and forage crop production will be as important as cereal seed today.

Again Coming Into Paypury Is Being Used For Manufacture Of Paper

Paypury, the feathered seed that more than 2,000 years ago supplied the principal food of the primitive man, is again being used in the manufacture of paper. According to publishers' reports, mills are being built in Canada and other parts of the world where the growth is plentiful. The modern process differs considerably from that of the ancients, the pulp being treated in a scientific manner as the wood pulp. In olden times, the triangular stem was split lengthwise into layers, which were pressed and dried into long, smooth sheets for writing.

Canada's Production of Chemical Pulp
Reports of bleached sulphite from Canadian mills during 1923 amounted to 165,468 tons, as compared with 155,572 tons in 1922 and 91,924 tons in 1920. It is very significant that whereas the American chemical pulp mills in 1917 produced 52 per cent. of the total chemical pulp consumed in that country, their proportion of the total tonnage in 1921 had fallen to 42 per cent. In the same year, Canada's exports of chemical pulp increased 117 per cent., largely as a result of the increased demand from the United States.

Women Agriculturists
Over 15,000 Canadian women are actively interested in the industry of agriculture, according to a statement made by Miss Beardsmore, Dominion Director of the committee on agriculture of the Federated Women's Institutes of Canada. Of this number only 1,195 are native-born.

Will Ship Grain Via Vancouver
The United Grain Growers will ship grain through Vancouver next crop year, for the first time since 1914, it moved west. The Vancouver board of harbor commissioners has leased a wharf No. 8, at the foot of the harbor, for the storage of grain, and has increased storage capacity to the 100,000 bushel organization.

The Greatness Of Canada Manufactures In The West

Edge of Development
At such a juncture as this we do well to recall that Canada is a land of big distances, and her great west has been great because of the largeness of her vistas. Short there are even less allied in the circumstances of today than there were in the days of the past. The paper and Mount Stephen, Strathcona and Mount Stephen, Laskin does well, therefore, in estimating the future to rural Englishmen that since the close of the Victorian era the population of Canada has increased from just over five million to about nine and a quarter millions; she has emerged as one of the great grain-growing countries of the world, and a substantial producer of dairy products; she has developed her manufacturing; the farthest thing from her mind. It wants to get out just as badly as you want it out, and all you have to do is open the door. There is not the least cause for excitement or fear to kill it.

If you run, especially if you strike at it, it may sting you; but if you hold your head down, keep your hands at your sides, and walk quietly away, the bee is preyed apt to turn back after it has forced you to retreat to a safe distance.

Surprising things can be done with bees by the person who is fearless, kind and deliberate. An acquaintance of mine who has had many times placed his hand right over a bee that was busy on a dower and made the little creature a prisoner in his palm. He says that at a long time the grip remains loose enough for the bee to move all its legs and escape, there will be no hurt to the bee, but if the hand tightens, the insect recognizes its danger, and fights for its life in any manner it knows. My acquaintance worked with bees for many years, and he is emphatic in declaring that they are quarrelsome.

Gold Mines In Britain
Big Reef Runs Under Forest of Dean
Near London
Gold mines have been known and worked in Great Britain for centuries. One of Queen Elizabeth's most prized possessions was a goblet made entirely of gold taken from a river in Scotland. The medals struck to commemorate the coronation of Charles I. were made of British gold. A long time ago it can be linked with the fact that Princess Mary's wedding ring was also made of gold from Wales. Even more interesting is the fact that there is a big reef of London a two or three hour's journey of London, and under the Forest of Dean, and the existence has been scientifically established. The configuration of the reef is very similar to that of the gold reefs in South Africa, and some experts predict that one day gold will be found here in paying quantities.

Great Glacial Area

Story of the Ascent of Mount Logan
By Member of Expedition
Recounting the story of the ascent of Mount Logan by the expedition of Mount Logan, the Canadian Club, which was a member, Col. W. W. Foster, D.S.O., of Vancouver, told members of the Canadian Club that the mountain is situated in the midst of a glacial area. One glacier, he said, is 10 miles long by 15 miles wide. The mountain is 100 miles around and contains many peaks, some 8,000 feet high.

Says Artificial Rain
No Method Successful Is Opinion of Authorities
Dr. W. J. Humphries, one of the greatest authorities on the weather, has said that the artificial rain-making process is not successful. He said that the process is not successful in any of the cases where it has been tried. He said that the process is not successful in any of the cases where it has been tried.

Forming Horticultural Clubs
Horticultural clubs are reported now being formed in the various towns throughout the Okanagan Valley which will later be united into one large organization. The latter will be of sufficient size to wait upon the provincial government with a request that it act as the main spring of the force in Ontario. This act would make the horticultural clubs a somewhat similar relation to the government to that enjoyed by the women's and farmers' institutes.

Big Damaged Dew Record Crowd
Total attendance at Calgary's big stampede and jubilee reached more than one hundred and fifty thousand people. The latter part of the festival was in attendance, including many special visitors and motion picture cameras. The latter part of the festival was in attendance, including many special visitors and motion picture cameras. The latter part of the festival was in attendance, including many special visitors and motion picture cameras.

Big Damaged Dew Record Crowd
Total attendance at Calgary's big stampede and jubilee reached more than one hundred and fifty thousand people. The latter part of the festival was in attendance, including many special visitors and motion picture cameras. The latter part of the festival was in attendance, including many special visitors and motion picture cameras.

Rest Will Benefit B.C.
Two million dollars increase in the newspaper business and a similar increase in the newspaper business. The latter part of the festival was in attendance, including many special visitors and motion picture cameras. The latter part of the festival was in attendance, including many special visitors and motion picture cameras.

Champion U. S. Wheat Grower
Northwestern Kansas claims a champion wheat grower in Albert Weaver, of Bird City. Mr. Weaver has averaged 4,200 acres of wheat this year, amounting to more than 500 bushels. He expects the crop to get his in excess of 112,000.

"Darby and Joan"
Chief Far Away Cough and his friend Mrs. Head, of the Blackfoot Indians, attended the McLeod Indian Day celebration and remained in each other old school mates. They were both well into their teens before they even met, and they were both surprised by the intrusion of the white man. Far Away Cough was his first Paleface at the age of 14, and they were both meeting their prime when the Palefaces were settling in their midst and they were already old before the first Pacific train passed over their beloved prairie. Their lives are wrapped up in the history of western Canada, and if they had literary inclinations they could write a history of their country with far greater claim to authority than any white historian who has told of the evolution of the west from second-hand information. Far Away Cough is 75 years old and Mrs. Head is 75.

Greater Interest Being Taken In Promoting And Fostering The Poultry Industry Here

Electric Light Aid To Sun Made Grass Grow Rapidly On New Jersey Golf Course

An experiment has recently been made in New Jersey with electric light by night for promoting a rapid growth of grass on a golf course. A clay gravel area was dug, and the top soil from another portion of the land used to provide about fifteen inches of soil for the green. Over a portion of it were erected twenty-four special reflectors, each containing a 1,000-watt tungsten bulb. The reflectors were hung four feet from the ground and gave a continuous even light. The weather was unfavorable to the rapid germination of grass seed, but the first seed came through under the electric light five days after planting. No grass came through on the unlighted portion of the green until two days later. At the end of three weeks the grass under the electric light was well advanced, while on the portion of the green under the lamps there was a growth of about one inch.

Canada's Ponies In London
Show Feasibility of Exchanging Products With All Parts of Empire
Under the heading "Flowers from Canada," the London Times says: "A novel exhibit at Wembley was fresh cut flowers from Canada, some 3,000 specimens of the most beautiful kind, which have been brought over in cold storage on the steamship Ausonia being in show in the Canadian National Hallways pavilion. The flowers, which are pink and white, were grown near Montreal by Mr. W. Oranston, Rye, and are as fine as any yet produced in England this year. It is not likely that Canadian-cut flowers will ever compete with home-grown blossoms in England markets. The Times intended that they should; but as a demonstration of the nearness of Canada to London and of the facility with which the products of all parts of the empire, however perishable, are now interchangeable, the shipment is distinctly interesting."

Restoring World's Wheat Supply

Free Importation From U. S. During Three Fall Months
For all three fall months of September, October and November, the duty of 25 per cent. on grade alfalfa imported into Canada from the United States will be remitted. This is the first time since 1914 that the duty has been remitted. It is felt that, with the removal of the duty, encouragement will be given to Canadian sheep breeders to import and enlarge their flocks. Owing to the increasing profitability of the sheep raising business, the government has been anxious to take almost any step necessary to ensure a steady supply of sheep for the growing demand. Prospects for this business are considered exceedingly bright.

Teachers Favor Tree Planting

Good Object Lesson in Betterment of Home Life
An interesting and important development of the tree planting movement is the attitude which teachers and educational authorities, particularly in Saskatchewan, are beginning to take towards it. Many school districts have been planning with the assistance of the forestry branch. In Saskatchewan 200 schools were last spring supplied with 125,000 seedlings and cuttings, and a smaller number were similarly assisted in Manitoba and Alberta. This object lesson in the betterment of home life by the improvement of surroundings is viewed as very important by western educationalists.

Restoring World's Wheat Supply

If Destroyed Wheat Be Returned to Normal in Fifteen Years
If all the wheat that is being destroyed today except one grain, how long would it take you to bring the world's supply of wheat back to normal? Without many calculations with pencil and paper, you have the answer to a question that is of great importance to the world. For example, if today you ate a loaf of bread that weighed eight ounces, you devoured between five thousand and six thousand grains of wheat. If all the wheat was destroyed except one grain, and you planted it, and kept on planting every grain that you produced, within fifteen years you would have the crop back to what it amounts to at present. What a simple thing to do, and how complete within only fifteen years.

Increase In Paper Products

One hundred and fifteen mills in operation in Canada during the past year, produced pulp and paper amounting to the value of \$187,170, as compared with an output of \$188,612, 100 for 1922, \$185,497 for 1921, and \$184,641 for 1920, according to a preliminary report of the bureau of statistics. There was little appreciable change in the volume or value of pulp, pulpwood and paper products, but there was an increase in the production of newsprint, which amounted to \$128,081 tons in 1921 as against 1,251,414 tons in 1920.

"Look. Here's where we were. The sun of the midnight sun. Twenty-four hours of equinox every day."
"That didn't you get any chance to wear your evening dress?"

More than \$12,000,000 has been spent by the U. S. Government in equipping the coastguard with ships to fight run-runners.

BARRE, SON OF KAZAN

James Oliver Curwood

A LOVE EPIC OF THE FAR NORTH

Copyright, 1917, by Doubleday, Page & Co.
"BARRE, SON OF KAZAN," a Viagraph Picture, With Wolf, the War Dog.
An Adaptation of This Story

Synopsis

Barre, son of Kazan and Gray Wolf, a famous Alaskan hunter, is the hero of this story. He is a man of great strength and courage, and is known throughout the north for his exploits. He is a man of great strength and courage, and is known throughout the north for his exploits. He is a man of great strength and courage, and is known throughout the north for his exploits.

CHAPTER III.—Continued.

When he went on, continuing in the direction he had been whistling yesterday, he slunk along with a disheartened sort of way. His head and ears were no longer alert, and his curiosity was gone. He was not only stomach-hungry; mother-hunger rose above his physical yearning for something to eat. He wanted his mother, as he had never wanted her before in his life. He wanted to snuggle his shivering little body close up to her and feel the warm caressing of her tongue and listen to the mothering whine of her voice. And he wanted Kazan, and the old wolf, and that little blue spot that was in the sky right over it. While he followed along alone, the edge of the creek, he whistled for them as a child might grieve.

The forest grew more open after a time, and this cheered him up a little. Also the fragrance of the sun was taking the ache out of his body. He grew hungrier and hungrier. He had depended entirely on Kazan and Gray Wolf for food. His parents had, in some way, made a great baby of him. Gray Wolf's blindness accounted for this, for since his birth he had not taken up her hunting with Kazan,

white sand. Across this sand, half an hour later, came a huge black bear. Until Barre had seen the others at play in the creek, his conceptions of the forests had not gone beyond his own kind, and such creatures as owls and rabbits and small feathered things. The others had not frightened him, because he still measured things by size, and Nokki was not half as big as Kazan. But the bear was monster beside which Kazan would have stood as a mere pigmy. He was big. If nature was taking this way of introducing Barre to the fact that there were more important creatures in the forests than dogs and wolves, and owls and rabbit, also was driving the point home with a little more than necessary emphasis. For Kazan, the bear, weighed six hundred pounds in the case of a male, and he was fat and sleek from a month's feasting on fish. His shiny coat was the black-river in the moonlight, and he walked with a curious rolling motion with his head hung low. The horror grew when he stopped broad-shouldered in the center of the clearing, feet from the rock under which Barre was sheltering as if he had the nerve.

It was quite evident that Wabayo had caught scent of him in the air. Barre could hear him sniff—could hear his breathing through the "straw" flapping in his reddish-brown coat as he swung suspiciously toward the big boulder. If Barre could hear him, then that little insignificant little sniff—was making that monster actually nervous and uneasy, he would have thought. But he did not know, for in a split of his side, was somewhat

to ride over the tops of the stubs, and now and then one of them fell with a startling crash.

Barre could go no farther. An hour before dusk he lay down in the open, weak and starved. The sun disappeared behind the forest. The moon rolled up from the east. The sky glittered with stars—and all through the little Barre lay as if dead. When morning came, he dragged himself to the stream for a drink. With his last strength he went on. It was the wolf's howl that connected him to struggle to the last for his life. He tried to him wanted to lie down and die. But the wolf-spark in him burned stronger. In the end it won. Half a mile farther on he came again to the green tundra.

(To be continued)

Made Unfortunate Start

After Two Mistakes Journalist Decided To Leave Town

One of the difficulties that beset even the best-intentioned journalists is told by one of that profession who decided to establish a newspaper in a "one horse" town, and was informed that a certain gallant colonel must at all costs be secured as the first number, therefore, contained a long article full of praise of the colonel's achievements, but unfortunately the headline, which should have read "Our Battle Scared Here," appeared as, "Our Battle Scared Here," and as an hour later the colonel's aide brought a glass, was round looking for the editor with a shout. An explanation was with difficulty effected, and an apology and correction were fortunately the compositor again slipped, and the apology explained that "the battle scared here" should have read, "Battle Scared Here." When the enterprising journalist saw his paper he wisely sought the railroad depot and moved on.

Discovery Of Sheffield Plate

Fusing Of Silver and Copper Was Done Accidentally

It is said that Sheffield plate was accidentally discovered by Thomas H. Davy, when he was repairing the handle of a pocket-knife composed partly of silver and partly of copper, and in making his repairs accidentally fused the two metals. He at once conceived the idea of uniting these two metals, and using this as a substitute for making articles which hitherto had been made of sterling silver only. He sent to have specialized in making small articles such as buckles, buttons, snuff-boxes and pocket-books, which were made of the new material. He did not appreciate how important his discovery was, and consequently did not reap the full fruits from his remarkable invention.

New Sea Discovery

Scientists Find Spot Where Two Great Currents Meet

In a recent scientific expedition on the sea, it was discovered that the (the likeliest) was two great currents meet. The mass of foam caused by their violent collision extended for miles, and the sea was covered with whirls and popples, yellowed, attracted by the immense supply of food. The first time the scientists found the eggs of haddock, the only marine life in the world. The eggs are being hatched in tanks. " vast numbers of jelly fish colored the water purple for many square miles. The expedition caught more than 100 species of fish.

Caution Was Required

Judge Needed Gift-giving Proof When Giving Up Cash

A former judge, who had become a cashier in a western bank, had once been asked to receive a check that a stranger had presented. The judge, "right," he said, "but the evidence you offer in identifying yourself as the person is in evidence." The most valuable article in the world is the money that is given up. "I have known you to hang a man on less evidence," was the stranger's response. "Quite likely," replied the ex-judge; "but when we're giving up gold cash we have to be careful."

Most Valuable Stamp

A British Gipsy postage stamp which was sold in 1856 for \$100,000 is now valued at \$12,500. It is the only one of its denomination of that issue and is said to be the most valuable stamp in existence. The most valuable ever printed in the United States is one of a five-cent issue from the town of Boston, 1846, and its value is \$10,000.

Mist: "How do you like your laundry?" Hyatt: "Very well indeed, sent a dozen coats last week, and everyone of the buttonholes came back."

Lumbago Pain

Accept only a Bayer package which contains proven directions. Handy "Bayer" boxes of 12 Tablets Also bottles of 24 and 100—Druggists Everywhere. The trade mark (registered in Canada) of Bayer Manufacture of Monksroth, Germany.

Mystery Man Of Arabia

Colonel Lawrence Was Great Figure In World War

The mystery man of Arabia, archaeologist, turned soldier and maker of kings, Colonel T. E. Lawrence, remained practically unknown until the end of the great war. He was one of the greatest figures in the world's struggle.

Members of the army medical board looked at the frail, five-foot, long-headed youth, winked at one another, and told him to run home to his mother and wait for the next war.

"Just four years after he had been turned down as physically unfit for the ranks, this young Oxford graduate, small of stature, shy and scholarly as ever, entered Damascus at the head of a victorious army."

In 1917 Lawrence and his associates, in co-operation with Faisal, Ali, and the 26th, blew up 24 Turkish trains, tore up 15,000 rails and destroyed 57 bridges and culverts. During the 18 months that he led the Arabs they dynamited 73 trains and bridges.

With his Arab army ever increasing and becoming more efficient, Lawrence, at the head of the Bedouin irregulars, eventually broke through the streets of Damascus.

In such small compass it is impossible to do justice to the exploits of Lawrence—of the times he went disguised into the Turkish lines, of his meeting with the Bedouin Robin Hood (an ancient sentinel who had slain 15 men, including Turks, in hand-to-hand combat in 17 years), of the wonderful battle he directed in the desolate streets of the lost city of Petra, where the palace, towers, and amphitheatre have for hundreds of years been occupied only by the haards and the jackals.

Good News For Italian Prisoners

An amnesty, a decree of far-reaching proportions, freeing all political offenders, except murderers, and releasing from the jail all prisoners of war, has been granted as an act of royal clemency, and as a contribution to national pacification, on the occasion of the completion of the quarter-century reign of King Victor Emmanuel. It is estimated that between ten and 12,000 prisoners will be affected.

Snapping Him Up

Sam (vicious snapper in cage): "It's apparent to me—"

Wilma: "Oh, really. I didn't know that the relationship was so close."

ONTARIO WOMAN REGAINS HEALTH

Wants Other Women to Know About Lydia E. Pinkham's Vegetable Compound

Mount Forest, Ont.—"Before I took Lydia E. Pinkham's Vegetable Compound I was in a miserable and painful condition. I was living in Allan's house, and I was in a one-day friend came and told me of the Vegetable Compound and advised me to take a bottle. I began to feel better. I began to feel better. I began to feel better."

Went throughout the Dominion and found health in Lydia E. Pinkham's Vegetable Compound. Unpleasant drugs are used in its preparation—just roots and herbs—and it can be taken in safety even by a nursing mother. For sale by all druggists.

Could Not Be Mistaken

Explorer Tells How Lizard Rejected Its Admirer

In "Adventures in Exploration at the World's End," William Beebe, the explorer, says: "No sooner had I passed beyond the open sandy beach of Galapagos Island, than little lizards began to dart along my path."

"I crept up to the first one I saw, anxious to get a photograph, and while looking into my camera almost trod upon it, so tame was it. While waiting for it to turn sideways, a big male crawled between my feet and nodded frantically to a scariest-throated female standing herself on a bit of lava. He crept a little nearer, nodded again, whereupon the lady lizard rose as high as possible upon all four legs, making for me like a sudden lightning bolt. She arched her body, blew herself up with air until she lost all semblance to a lizard, and turning her head slowly, spat upon my admirer. He turned, nonchalantly caught a fly, and sally made for it elsewhere. Never have I seen such a sudden transformation, or a more unmistakable indication of disposition."

Last But Twelve Hours

Flowers of Night-Blooming Cereus Withers At Dawn

Of the many beautiful flowers of the Hawaiian Islands, the night-blooming cereus, which comes out of itself in the case of the cereus family and is without competition, as it is the only of its kind, is the most beautiful. The flower is about twelve hours in bloom. It begins to open as the shades of night gather, and by the time dark comes the flower is fully open. But with the coming of the morning it begins to close and wither, never to open again.

These flowers come in countless numbers and are nine inches in length and from six to eight inches across. The petals are snow-white, while the deep calyx is a rich yellow.

June, July and August is the blooming season, but there is only one night when the birds come forth in all their glory. On that night the people of Honolulu turn out to pay homage to this queen of flowers.

It Bids Pain Turn to Pain. When neuralgia strikes the nerve or lumbago cripples the back is the time to test the strength of Dr. Thomas' Electric Balm. Will rub it in it will still the pain that comes from a tension of the nerves. A trial of it will establish faith in its power.

A Triumph "There!" said the acrobat girl, as she laid down her pen. "I think we've secured it. Twenty-four cards and only nine beginning. Just a line to let you know!"

Recognized as a leading specialist for the destruction of worms. Mother and child. From Entomologist has proved a boon to suffering mothers. Just a few drops.

A Homely Illustration

Toasting Bread Shows Main Principle Accounting For Heat at Equator

Every time we toast a piece of bread we are illustrating the main principle which chiefly accounts for the earth being hotter at the equator than at the poles. If we hold the bread parallel to the fire, it gets the full heat, but if we tilt it slantwise, it takes longer to toast. The equator is the part of the earth's globe that gets the most direct rays from the sun, the poles the parts that get the most slanting rays. In the case we set a sun directly overhead at some part of the day; in the other, the sun at its very best only "rises" to a point low down on the horizon, and so gives off rays extremely on the slant. These slantwise rays, too, have to pass through much more atmosphere than the straight rays, and as our atmosphere acts as a sort of blanket, with its mists and fog, it follows that the heat of the slanting rays is still further reduced in power. Other considerations also have their bearing upon the question, but the straight rays from the sun are the main factor in the comparative heat of the equator over the poles.

Work Worth While

The thing which you most dislike to do may be worth more to you than a better dozen of pleasant tasks. Say "What should I do?" instead of pampering your dislikes. Many dislikes are changed to likes, when the task is honestly faced and attempted.

Which Did She Want

She: "I noticed you hesitated when I asked you if I was the only girl you had ever loved."

He: "Yes, I couldn't tell from your expression whether you wanted me to say 'No' or 'Yes.'"

Pigs raised on the high lands of Tibet are covered with thick, rusty colored hair.

Minard's Liniment for Corns and Warts

A Sweet Breath at all times!

After eating or smoking Wrigley's chewing gum sweetens the breath. Never are mouth, throat or tongue so refreshed and digestion aided as by eating or smoking Wrigley's chewing gum.

Wrigley's Chewing Gum

Good Salesmanship

Jew Decided Arguing With Customer Was Bad Business

A story is told of a Jew who was selling a suit of clothes to a customer. "It looks pretty well, but I doubt if it's all wool," said the customer. "That do you like it?" replied the shopkeeper.

"Yes, I like it, but I don't think it is wool."

"Then, shall I wrap it up for you?" "Sure," replied the customer. "I'll take it. But why didn't you argue with me?"

"Because," replied the merchant, holding out his hand for his money. "If I win the argument, I lose the sale; so what's the use?"

SUMMER COMPLAINTS KILL LITTLE ONES

At the first sign of illness during hot weather give the little ones Baby's Own Tablets. These Tablets may be beyond aid. These Tablets will prevent summer complaints. If given occasionally to the well child, and will promptly relieve the troubles if they come on suddenly. Baby's Own Tablets should always be kept in every home where there are young children. There is no other medicine as good as Baby's Own Tablets for the cure of summer complaints. The Tablets are sold by medicine dealers or by mail at 25c. per box from The Dr. Williams' Medicine Co., Brockville, Ont.

See Origin Great Wheat Importer

A prophecy that the Orient would become, in the near future, a really large importer of Canadian wheat, was made by Hon. Dr. J. H. King, Ottawa, minister of public works.

In predicting increased Oriental trade in grain, Dr. King pointed out that imports of wheat from Canada for 1922-23 increased 40 per cent.

Minard's Liniment for Aches and Pains

A German inventor has perfected a remedy for muscular aches and pains. The apparatus times the ache from the craft to the ground within one-thousandth of a second.

The brain is the most variable in size and quality of all the parts of the human body.

The Right Way to Boil Potatoes

Put the potatoes in an S.M.P. Enamel Pot. Cover with water. Add salt. Boil until done. Drain off the water. Boil again through the strainer again. No danger of steam scalding the hands because the handle securely holds the pot. If you family uses potatoes, you require one of these.

W. N. U. 1549

Britain Celebrates Hundred Years of Railroading

Oyten-Britain's first railway on the Stockton & Darlington Railway. Inset—The interior of the observation car on the Canadian Pacific Train-Canada. Lower—The train-Canada leaving Montreal.

The old Stockton and Darlington Railway, in England, is a matter of history now. Its board of directors is no more; its inventor has passed to his reward; its rolling stock, or what survives of it, rests in peace in museums—having served its day and been left behind in the march of progress.

But this year—a century since the time when the Stockton and Darlington Railway was regarded as a marvellous engineering achievement and threatened the supremacy of the stage coach as a means of long-distance transportation—the ancient engine have been taken down from their pedestals, the wheels oiled, the rust removed and once again high hatted gentlemen and bonneted maidens have been bumped along from Stockton to Darlington behind the first real locomotive England ever had.

Thus the people of Great Britain celebrated its railway centenary. Processions of defunct rolling stock, and rolling stock that is almost defunct illustrated the evolution of railway transportation and gave to the rising generation an insight into the

agencies our grandparents had to endure if they wished to go from one place to another by train. The Duke and Duchess of York attended the celebrations and, watching the parade, became thoroughly infected with the spirit of the occasion. All those who took part in the procession, and some of those who didn't, dressed in the costumes of the period, giving to the celebrations an atmosphere altogether in keeping with the nature of the celebration.

By way of showing the wonderful development that has taken place in railroading since the first engine painfully puffed its way from Darlington to Stockton there is shown above one of the engines used in the centenary celebrations pulling a replica of the original train constructed with the ultra-modern Trans-Canada, the all-steel Canadian Pacific Train, which nowadays conveys its passengers from one part of the Dominion to another, three thousand miles away, at a speed considered unattainable by our forefathers, and in greater comfort and security than many of them enjoyed at home.

You are cordially invited to attend a series of

Free Demonstrations of Baking

conducted by practical and experienced Domestic Science experts, and members of the Educational Department of E. W. Gillett Company Limited, manufacturers of

Magic Baking Powder, under whose auspices these demonstrations are held.

At the following store,
From August 18th to August 22nd.

S. A. MILLER
OYEN ——— ALBERTA

About Town and Country

W. V. Miller, agent for the Waterloo Manufacturing Co., has sold five threshing machines and one 15-27 Heider gas tractor this season.

Constable Dobbin and his family returned to Oyen from Drumheller, last Saturday.

Mrs. H. C. Swartzlander and son Frank, returned to Oyen last Sunday after spending a vacation visiting relatives in Ontario.

Mr. and Mrs. M. G. Whitlock and family, who have been spending a vacation in Winnipeg and vicinity, returned to Oyen last Sunday.

The regular monthly meeting of the Knights of Pythias lodge scheduled for to-morrow night, has been postponed on account of harvest. The lodge will meet on Thursday, August 27, at 8 p.m.

Rev. and Mrs. C. R. Corcoran and family left last Monday for Toronto where they will spend a vacation.

Mr. and Mrs. J. J. Kelly and family and Miss McInosh moved to Youngstown on Monday.

Andy Carr had the misfortune to break a rib last Saturday, when a case of goods fell on his side.

Charles Harris, who has been on an extended tour in Manitoba, in connection with the Farmers' Union, returned to Oyen yesterday. Mr. Harris states that the Union is making great strides and the membership is advancing by leaps and bounds.

Mrs. W. V. Miller and children left this morning to spend a few days in Calgary.

Mr. and Mrs. S. A. Miller and son, Mrs. W. H. Peterson and Mrs. Lee, returned to Oyen last Thursday evening after spending a few days in Calgary.

Mrs. C. D. McMillan returned to Oyen from Banff on Monday.

W. T. Cochrane, of Rockyford, Deputy District Grand Master, paid an official visit to Oyen Lodge No. 104, A.F. and A.M. last night.

The third installment of the story "Baron, Son of Kazan," by James Oliver Curwood, appears on page seven of this issue. Don't miss any of this fascinating serial.

Mr. and Mrs. F. L. Aylesworth who have been spending the last five weeks in Edmonton, returned to Oyen this morning.

Archibald Mitchell, the well known tree planting authority, is making his sixth annual tour of the prairie provinces with the Canadian Forestry Association's "Tree Planting Car" and will be at Oyen, on Monday, August 17. Come prepared to talk over your shelter belt problems with Mr. Mitchell. Motion picture lecture at 8 p.m. No admission fee.

Mrs. A. F. Mitchell and daughters, Viva and Ida, who have been the guests of Mr. and Mrs. J. C. Dasso for the last month, left on Saturday for Edmonton.

James Ray of Youngstown, is now on the staff at Deser's barber shop.

Make MORE Money with CASE Machinery

Your Best Investment

Your best investment is the one that makes you the most certain profit. With a Case Steel Thresher you have two chances to increase your income—not only this year, but for many years to come.

You can thresh your own grain better and when in the best of condition—and you can make money doing the same good work for the neighbors.

Efficient—Case machines are noted for their fast, clean threshing of all crops.

Thrashes All Grains and Seeds—From proms and beans to the finest corn seed.

Built of Steel—A strong steel frame holds bearings in line and prevents warping and twisting. Steel covering and steel construction contribute to great strength, easy running, dependability and long life.

Durable—The average life of a Case Thresher is easily twenty years. Most of the first steel machines sold in 1904 are still in use and the machines made today are even more durable.

Service—Dependable and prompt service facilities leave Case owners no possible delay at threshing time.

Threshing with your own machine is profitable. An investment in a Case Machine makes this profit larger and more certain. If you want to make more money at farming—in and get facts and figures about Case threshers.
